

Revolution™ Customer Testimonials

HUNTER
Engineering Company

Bert's Service

Athens, IL

“ I would recommend the Revolution™ to any shop regardless of volume. Today's assemblies are getting more and more complicated. The Revolution™ has helped us change complicated assemblies with speed and efficiency. ”

Bert Kincaid

Owner, Bert's Service

Bert's SERVICE

We have been in business for 40 years, since June of 1976. Within the first year of owning this shop we purchased a Hunter aligner and rack. Throughout the years we have upgraded our aligner and added a Hunter Road Force® balancer as well.

Now we have invested in our first Hunter tire changer, the Revolution™. With our old tire changer, it would take us two or three guys to change stubborn combinations without problems or damaging the wheel. Runflats aren't so rare anymore. But, with the Revolution™ it only takes one technician to change even the most difficult assemblies. It takes all of the pressure off our techs and they love using it.

I would recommend the Revolution™ to any shop regardless of volume. Today's assemblies are getting more and more complicated. The Revolution™ has helped us change complicated assemblies with speed and efficiency.

I don't see how a shop could not consider the Revolution™. If you figure in damage, additional help and injury risk, the investment is more than worth it. With the Revolution™ we can spend as little as 15 minutes on a set of four tires. We can also show our customers that we are using the best technology to keep from damaging their wheels.

Hunter has always been on the cutting edge. We are a small shop in a small town, and a lot of shops around us have to charge more for tires that we do to justify their loss and damage. We have left them in the dust with the Revolution™.

Madison Tire Co., Inc.

Madison, NJ

“When we saw the Hunter Revolution™ tire changer it occurred to us that this machine could become the great equalizer and put all our techs on an equal plane.”

John Kirwan

Owner, Madison Tire Co., Inc.

Madison Tire Co., Inc

Madison Tire is a busy tire store and auto repair facility in the heart of Madison, New Jersey. We have been serving the community for 60 years and our customer base covers old to new and small cars to mid-size trucks. We employ 6 techs and are faced with varying skill levels regarding demounting and mounting tires. We needed to address the numerous tire and wheel mounting issues that inevitably arise with such a diverse customer base and avoid the expense that goes along with the learning curve especially with a new employee.

We wanted to expand our aftermarket line but were concerned with the same mounting issues. When we saw the Revolution tire changer it occurred to us that this machine could become the great equalizer and put all our tire techs on an equal plane. Well, the Revolution has been an integral part of our shop since February and our expectations have been exceeded. Our techs have all adapted to the new technology and we're extremely happy with the efficiency, particularly the time and manpower that was lost on difficult tires and wheels which invariably occurred on our busiest days.

The Hunter Revolution is truly the "Great Equalizer"!

Sincerely,

John Kirwan

Plaza Mercedes-Benz

St. Louis, MO

“ We see a lot of run flats and low profile tires and the Revolution™ has helped us handle these faster while still protecting TPMS sensors. ”

Matt Prunty

Service Manager, Plaza Mercedes-Benz

11830 Olive Boulevard, Cave Court, Missouri 63141
314-301-1700 1-800-325-7060 Fax 314-301-1770

Our decision to invest in Hunter's new Revolution tire changer has had an incredible impact on our daily operations. There has been a night and day difference on the amount of wear and tear our technicians go through, using the Revolution is much easier than using traditional equipment.

We have seen huge consistency in the time it takes to change tires and this has been a great improvement for us compared to our old machines. We see a lot of runflats and low profile tires and the Revolution has helped us handle these faster while still protecting TPMS sensors. Training is absolutely foolproof, and once you change your first tire on the machine, you are able to handle any tire that comes into the shop.

Simply put, the Revolution is just much better than the old way of doing things.

Sincerely,

Matt Prunty
