

BL SERIES

Turn a profit for your shop

Anti-Chatter Technology (optional)

Adjustable feed rate

Digi-Cal measurement (optional)

Flexible workspace configurations available

BL Series brake lathe at-a-glance

THERE'S A LOT GOING ON UNDER THE HOOD

The Hunter BL Series Brake Lathe's flexibility allows for accurate servicing of both rotors and drums.

OPTIONAL, PATENTED

Anti-Chatter Technology

- Oscillates machining speed to prevent buildup of vibration (chatter)
- ✓ No bands or other devices required

OPTIONAL

Digi-Cal measurement

- Determine if workpiece should be discarded prior to machining
- Accurately determines depth of cut
- Perform one-cut service

OPTIONAL

Touchscreen interface

- ✓ Instant access to rotor specs
- ✓ Thickness and depth cut display
- On-board operation videos

STANDARD

Quick change

- Twin cutters pivot to quickly change from rotors to drums
- No storing of cutting head required

STANDARD

Disc/drum control lockout

- ✓ Prevents "crashing" of machine
- Warning indication reminder

STANDARD

Adjustable feed rate

- Dial fast for rapid removal or slow for final surface finish
- One-cut pass capable

OPTIONAL

Push-button speed control

- Three working speeds
- Eliminates belt changes

STANDARD

Dual LED work lamps

- ✓ Illuminate both sides of workpiece
- ✓ Fully adjustable push-button control

OPTIONAL

Mobile bench

- Heavy-duty, covered adaptor storage
- Large, locking casters

ENOUGH WITH THE CHATTER

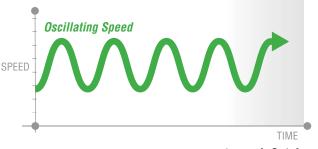

Anti-Chatter Technology eliminates buildup of vibration — stop chatter before it starts!

Oscillating speed

Anti-Chatter Technology (ACT) varies spindle speed to keep chatter-inducing vibration from starting, resulting in a smoother surface finish.

Smooth finish

Fixed speed

Chatter can start when machining rotors at a fixed speed. This is similar to a how a moistened finger can make a crystal glass sing.

Rough finish from chatter

Digi-Cal measurement

MEASURE ROTOR DIMENSIONS AND DEPTH OF CUT

- Measuring system is located at the end of the cutter shaft
- ÷Q: Bright LED illuminates the backside of the rotor
- Does not lose calibration when turned off or stored
- Dimensions turn red on the screen when attempting to cut rotor below manufacturer's specification. (requires tablet option)

Touchscreen interface (optional)

FULL CONTROL OF THE CUT

- Compare thickness and diameter to OE specs
- On-screen messages and animations make technicians more efficient
- ✓ Bit Minder tracks bit usage
- Training videos, multiple languages and more

Adjust and calibrate

FROM ROTORS TO DRUMS, AND BACK AGAIN

® Change brake type in seconds

STEP 1 Change from rotors to drums...

... by loosening clamp screw, removing rotor setup, rotating twin cutter...

STEP 2

STEP 3and set up drum service assembly and extend drum boring bar

♂ Control the speed

ACT / DIGI-CAL 2.0 PACKAGE

Push Button Speed

✓ Push button control with three working speeds

STANDARD

Adjustable Spindle Speeds

- ✓ Provides correct speed for all size workpieces
- ✓ No tools required

Optional equipment

BUILD IT TO FIT YOUR SHOP

HUNTER

Bench

- ✓ Heavy-gauge, all-steel construction
- Hang frequently used adaptors
- Large chip collection funnel keeps debris off the floor
- ✓ Includes storage drawer and document holder

BL70E shown includes tablet interface, ACT / Digi-Cal 2.0 package, rotor capability and is shown with optional bench and optional adaptors.

Mobile bench with chip funnel — 20-4066-1

Flexibility and adaptability for your shop

- Heavy-duty, covered adaptor storage
- ✓ Large, locking casters

- Designed to contain brake machining dust and metal particles
- Access window allows easy viewing of workpiece during machining

Requires a conventional shop vacuum with 2.5" inlet hose (not supplied). 1-7/8" arbor kits not compatible with dust containment system

PATENTED

Hunter Passenger Car and Light Truck Adaptor Kits

Customize your Hunter BL series lathe to match your service needs. Select the appropriate adaptor kit to service most rotors, drums and flywheels.

Basic adaptor kit -20-1665-1

For passenger cars

Dual QuickChuck™ adaptor kit - 20-2614-1

For passenger cars, light trucks and larger light trucks

Elite cone adaptor kit - 20-2615-1

For passenger cars, light trucks and larger light trucks

Dual QuickChuck™ adaptor — 175-423-2

Quick setup and unparalleled centering ability, ideal for hubless drums

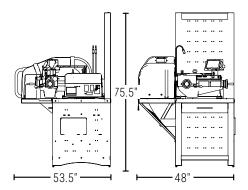

SPECIFICATIONS

Rotor Diameter*	152.4 - 584.2 mm (6 - 22 in.)	
Rotor Max Width	136.5 mm (5 3/8 in.)	
Rotor Max Thickness	50.8 mm (2 in.)	
Drum Diameter*	152.4 - 609.6 mm (6 - 24 in.)	
Drum Max Width	203.2 mm (8 in.)	
Max Weight on 1 7/8" arbor	90.7 kg (200 lbs)	
Motor	1.12 kw (1.5 hp)	
Spindle Speeds	85 / 110 / 175 rpm	
Feed Rate	.0536 mm/rev. (002014 in. / rev) Infinitely variable	
Power Requirements	115/230 V, 15/7.5 amp, 50/60 Hz, 1ph	
Shipping Weight	222 kg (488 lbs.) (approx.)	

Measurements with Bench

Some specifications may vary depending upon workpiece configurations or require optional adaptors.

^{*} Max rotor and drum diameter is 495 mm (19.5 in.) with the hood installed.
