

Nissan Service Information Bulletin

TechMate Tools and Equipment

Alignment and Wheel Balancing Equipment Requirements

Reference: NSIB/23-023

Date: January 31, 2024

This bulletin supersedes NPSB/18-374, including rev "a" and "b", as well as NSIB/20-004

Nissan originally established minimum requirements for wheel alignment and wheel balancing equipment in October of 2018 with NPSB/18-374. In 2020, Nissan extended the compliance date for meeting the minimum wheel alignment and wheel balancing equipment requirements to October 2025.

We are now reminding our dealers that the October 2025 compliance date is approaching and want to provide ample notice for dealers who need to purchase new equipment before the October 2025 compliance date.

Nissan has selected the Hunter Engineer Hawkeye Elite® alignment system as the minimum required wheel alignment equipment. Hunter equipment meeting the Nissan requirements can only be purchased through the Nissan TechMate Tools and Equipment program.

Minimum Alignment Equipment Requirement

- Hunter alignment system with Hawkeye Elite® Sensors
- Compatible alignment rack for the above alignment system

Optional Alignment Equipment Upgrade (Exceeds Above Requirement)

- Hunter Ultimate ADAS™ Wheel Alignment and ADAS Calibration System

To learn more about this equipment and possible upgrade paths for existing equipment, visit www.hunter.com/nissan

Alignment and Wheel Balancing Equipment Requirements

Reference: NSIB/23-023

Date: January 31, 2024

Nissan has selected Road Force® Elite as the minimum required wheel balancing equipment. Hunter equipment meeting the Nissan requirements can only be purchased through the Nissan TechMate Tools and Equipment program.

As TechMate is a direct distributor of Hunter equipment, our partnership will ensure your dealership can easily meet the wheel alignment and wheel balancing equipment standards outlined here.

Hunter's Sales and Service teams are your direct link to purchasing through TechMate and are ready to ensure you have the right equipment for all your wheel and tire service needs.

- The best wheel and tire service equipment at the best pricing!
- Convenience of Nissan Non-Vehicle Account (NVA) billing for products and services
- Convenient financing options available at the time of sale
- Compliance with Nissan's wheel and tire service equipment standards
- Compliance with Nissan's APRM calibration and inspection requirements

Reach your local Hunter Engineering Sales and Service team at: www.Hunter.com/contact/

If you have questions about these upcoming equipment requirements, send an email to techmate.equipment@nissan-usa.com
