Game-changing enhancements

DRIVEN BY INSPECTION LIVE™

Hunter's Quick Check has driven shop revenue opportunities for over a decade. Inspection live software is the next step to simplify shop operations.

- ✓ All-in-one subscription combines stable, on-site software with automatic over-the-air updates
- ✓ Your inspection lane will always have the latest OEM specs and software
- ✓ Continually updated HunterNet® features resonate with vehicle owners and drive service authorizations
- ✓ Inspection Live™ subscription is easy to manage in HunterNet® and includes flexible payment options, status and update notifications, and error monitoring

OVER-THE-AIR UPDATES

Automatic weekly spec updates and quarterly license plate recognition enhancements

MANAGE TWO LANES WITH SINGLE CONSOLE

Run multiple lanes with smaller upfront equipment investment and reduced equipment footprint

REFRESHED FLIGHTBOARD™

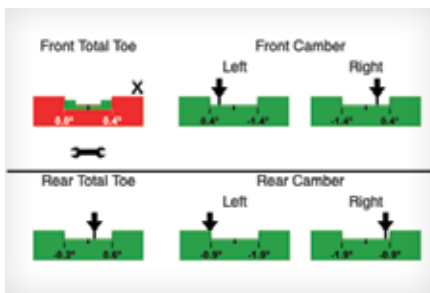

More eye-catching icons and tire renders plus shareable link makes display on any screen location easy

EASY MANAGEMENT THROUGH HUNTERNET®

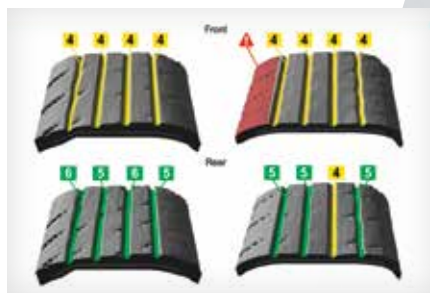

Manage Inspection Live™ subscription and integrated partners, view reporting from all stores, and more

AUTOMATIC ALIGNMENT MEASUREMENTS

Present major alignment angles like toe and camber to customers simply by driving through

CAPTURE LASER-MEASURED TREAD

Present laser-generated exact tread measurements as a live render of the actual tread patch

BODY DAMAGE CAMERAS

Protect against mistaken damage claims using 40+ photos captured automatically for each vehicle

NO STOPPING

NO LABOR

NO DATA ENTRY*

* Certain situations may require data entry, such as trim selection, missing license plates, etc.

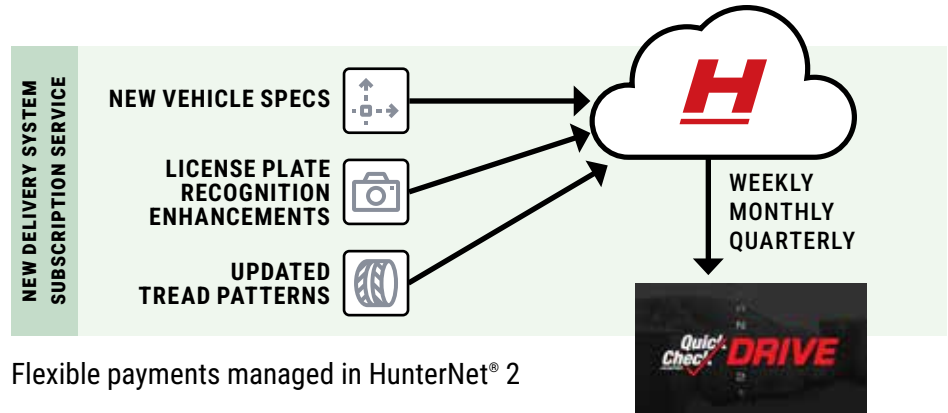

New software

INSPECTION LIVE™

Hunter's new inspection software is managed over-the-air as a full package subscription, processing inspection and body damage camera results plus automatic updates to the latest specs, license plate recognition enhancements, and feature updates.

Automatic updates

- ✓ Weekly spec updates – update vehicles and plate recognition
- ✓ Monthly software feature updates – including new tread patterns
- ✓ Quarterly license plate recognition enhancements

Flexible payments managed in HunterNet® 2

Inspection Live™ can support two lanes with single console

- ✓ Less upfront equipment investment needed to run multiple lanes
- ✓ Immediately view full system status on the console – keep your lane running smooth
- ✓ Reduced equipment footprint

UPGRADEABLE ON EXISTING QUICK CHECK® SYSTEMS

Inspection Live™ only available in the United States and Canada at this time.

Flightboard™ digital results display

SHOW CUSTOMERS A CLEAR CALL TO ACTION

**ENHANCE
CUSTOMER
EXPERIENCE**

- ✓ Provide immediate feedback on alignment and tread depth inspections
- ✓ Alert customers to important safety recall information
- ✓ Digital presentation helps inform customer before reviewing with technician or service writer
- ✓ Customer vehicle results display automatically in waiting area or service drive

**GO BEYOND
PAPER RESULTS**

Visualize sales opportunities

Your alignment and tire business rely on trusted and powerful data-driven tools

**FEEDBACK TRANSLATES
INTO OPPORTUNITY**

Alignment = = **Alignment Sale**

Tread = = **Tire Sale**

NEW! Exclude dealer/ non-customer traffic

- ✓ Upload a list of plates to ignore – keep dealer vehicles out of results displays
- ✓ More accurate performance reporting

NEW! Refreshed Flightboard™ for easy management

- ✓ New icons and tire renders are eye catching, give clear call to action

Take immediate action on pass/fail

Add specs in one click to get a pass/fail result

Know when a car re-run is needed or if traffic flow needs addressing

- ✓ Shareable link makes display on any screen location easy and removes login
- ✓ Mix and match lanes to make multiple custom Flightboards

Check every vehicle. See every opportunity.

POWERED BY PATENTED TECHNOLOGY

Four high-definition cameras

- ✓ License plate images identify vehicle
- ✓ 40 or more still images captured as vehicle drives past to defend against false damage claims

Eight cameras and 32 lasers

- ✓ Accurately measure camber and total toe
- ✓ 16 measurements for increased accuracy
- ✓ Repeatable results

Intricate tire tread mapping

- ✓ Lasers map over 400,000 data points across a 4-inch section
- ✓ Visually compelling unique 3D renders of each tire

Intelligent and fast

- ✓ Results based on specific OEM Spec
- ✓ Scan a new vehicle every 3-5 seconds
- ✓ Inspection Live Software updates software to newest features automatically

“ Once they saw the measurements from one machine to another and the time savings, our guys were really impressed with it.”

The secret to keeping good technicians is giving them good tools. Quick Check Drive® has helped the technicians at Big O Tires make the most of their time.

– **Jesse Burg**

Procurement Manager of Big O Tires in Columbia, MO

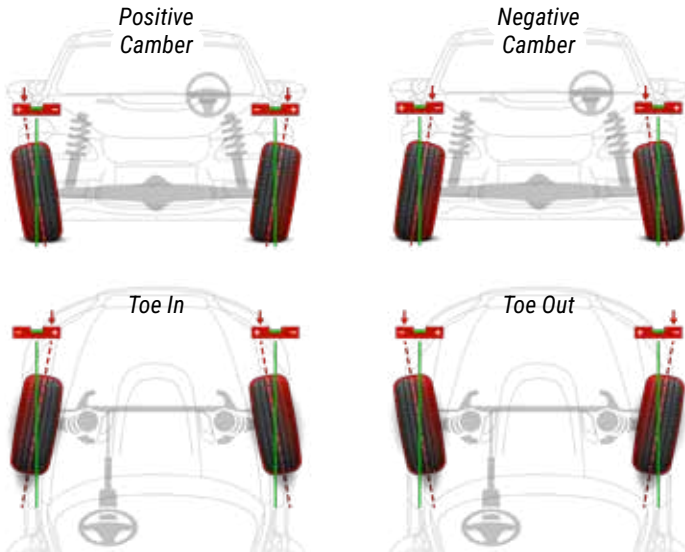

Automatic measurements uncover opportunities

QUICK CHECK DRIVE®

Automatic alignment angle check

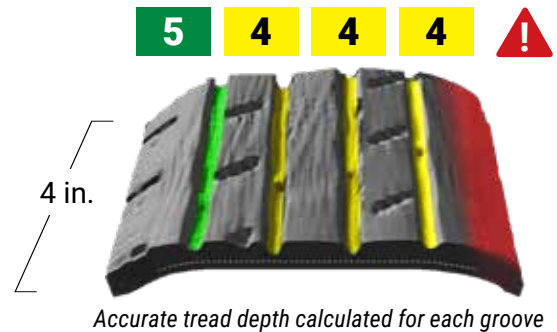

- ✓ Measure total toe and individual camber
- ✓ Generate opportunities for the most profitable service

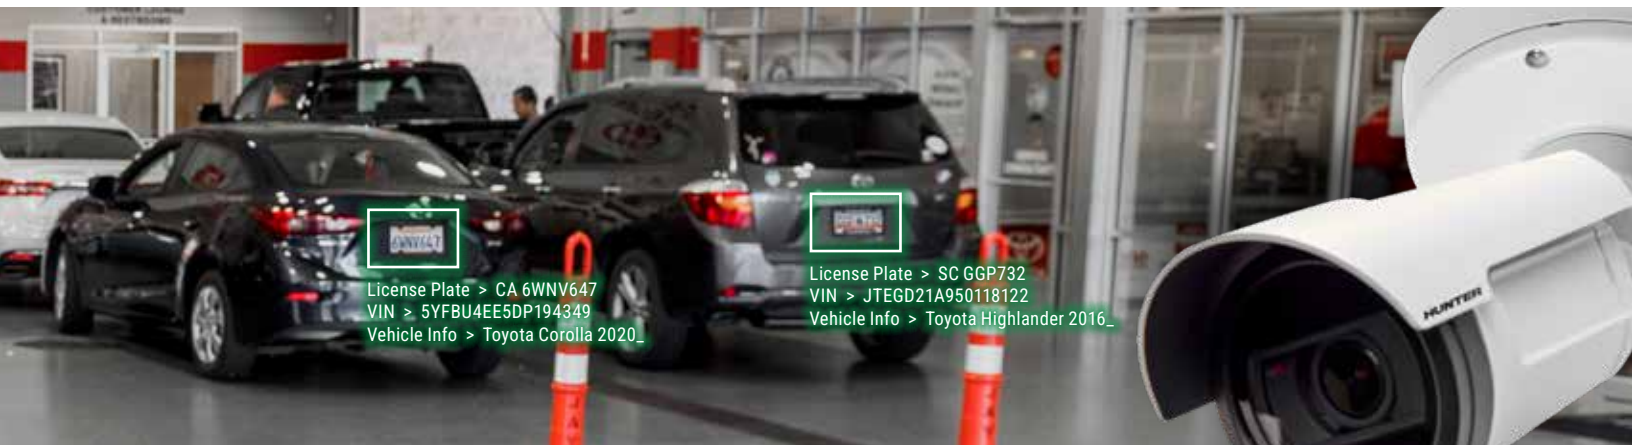

QUICK TREAD EDGE®

Automatic tread depth measurement

- ✓ Measuring tire tread edge wear is critical to proactive tire safety
- ✓ 3D tire results help sell critical replacements

DID YOU KNOW? A bald tire edge will affect wet weather traction, resulting in longer stopping distances and poor handling. If the edge portion of the contact patch has no tread, it cannot shed water.

Find exact OEM specs fast with automatic vehicle identification

PATENT PENDING

Quick Check Drive® units include an external camera — the first step to accurate results. The vehicle's license plate is captured as the vehicle drives through. In most cases, the system finds the exact OEM specs to compare against the alignment and tread measurements, for the most accurate pass/fail results.

- ✓ **Exceptional character identification**
- ✓ **Extensive license plate coverage** — every U.S. state and most Canadian provinces
- ✓ **Flexible installation options** — indoor or outdoor, ceiling- or wall-mounted, front or rear plate capture, etc.

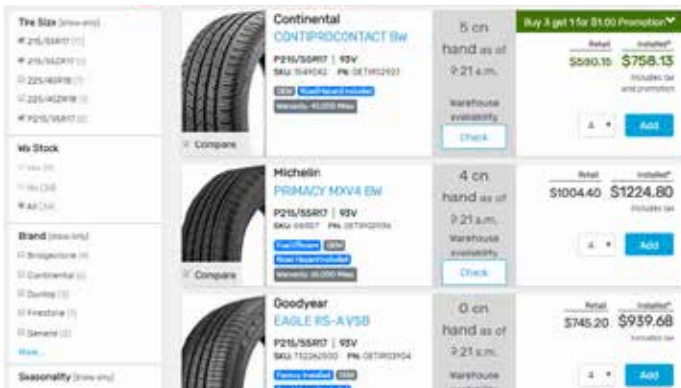

Partner integrations

PROVIDE A SEAMLESS CUSTOMER EXPERIENCE

Our 25+ industry-leading partners integrate with virtually every major dealer and shop management system to provide seamless customer service experience.

AutoPoint sample phone interface

Simplified tire offers (6 PARTNERS)

- ✓ View, manage, and order tires
- ✓ Make the immediate connection between the customer's tire tread results and the tire sale

Messaging services (6 PARTNERS)

- ✓ Communicate directly with customers
- ✓ Include valuable inspection results
- ✓ Get approvals with less effort
- ✓ Increase customer engagement with follow-up materials

Multi-point inspection (9 PARTNERS)

- ✓ Streamline operations between front and back staff
- ✓ Track scheduling, service write-ups, video walkarounds, parts, and more

Self-service check-in (8 PARTNERS)

Recommend services via kiosk or mobile self-check-in services

- ✓ Relieve busy overflow
- ✓ Write more ROs without added staff
- ✓ Engage younger customers

Partner integrations

WHO CAN INTEGRATE WITH HUNTER?

Auto dealer

Aftermarket

Sample GoMoto inspection results

“ If you’re in a dealership and you haven’t looked at Hunter Quick Check®, you’ve got to see what you’re missing. It’s going to generate revenue; it’s going to pay for itself. There are a lot of benefits you just won’t realize until you see it in action. ”

– Micah Baalbargen

Fixed Ops Director of Parkway Family Auto Group in Texas

Your drive through bay

CHOOSING THE RIGHT SYSTEM

ALIGNMENT INSPECTION

Hunter's Quick Check Drive® is the industry's first truly unmanned and repeatable touchless alignment check solution.

DID YOU KNOW?

In a 25,000-vehicle study, 51% of all vehicles needed an alignment but showed no irregular tire wear. Only 10% had irregular wear and needed an alignment.

CONCLUSION:

Tread appearance is NOT a reliable predictor of alignment need.

HUNTER QUICK CHECK DRIVE®

Alignment measurement	Direct total toe and individual camber laser measurement – 6-month ROI is typical
Vehicle recognition	Automatically captures plate and VIN for exact OEM alignment specs
Drive through experience	Minimal footprint for inviting drive through experience
Body damage cameras	Standard with subscription

COMPETITOR

Alignment predicted from tire wear – not always reliable
Plate captured for identification purposes only
Large footprint with narrow driving lane; can be height limited in some cases.
Standard with subscription

TIRE TREAD INSPECTION

Hunter's Quick Tread Edge® provides more information in less time with greater reliability than any other drive-over tread depth system.

HUNTER QUICK TREAD EDGE®

Tread measurement	3D laser tire scan of over 400,000 data points for exact measurement
Tread display	Color coded tread depth and edge wear warning
Weather resistance	Self-cleaning

COMPETITOR

Tread interpreted from photo analysis
Color coded tread depth
None

EQUIPMENT SERVICE AND RESULTS

Hunter backs our inspection equipment with great inspection result display options, and industry-leading service.

DID YOU KNOW?

The HunterNet® customer portal directly connects customers with local certified Hunter Service Rep for scheduled or same-day needs – pairing the latest technology with the industry's leading service for a more productive inspection lane.

HUNTER

Service and support	Backed by 400+ Hunter Field Reps located across the country
Customer portal	Display and share inspection results plus a full HunterNet® suite of parts ordering, coverage guides, and connectivity to other Hunter Equipment
In-lane display	Customer-branded Flightboard
Partner integrations	Alignment and tread results available in 25+ Integration Partner apps

COMPETITOR

Service dispatched from only two locations
Only to display and share results
No in-lane display
Results available in less than 15 partner apps

FOCUSED ON PROFITS

Autonomously identify profitable service opportunities. Most systems pay for themselves within six months.

“ Everything we do is for the long term. If we can't do it right, we won't do it.”

With Hunter's Quick Check Drive® inspection system, Ken's shop quadrupled their alignment business overnight, and the tire business at least doubled.

– Ken Silverman, Owner of Lake Norman Tire & Auto in Mooresville, NC

TIRE REPLACEMENT OPPORTUNITIES

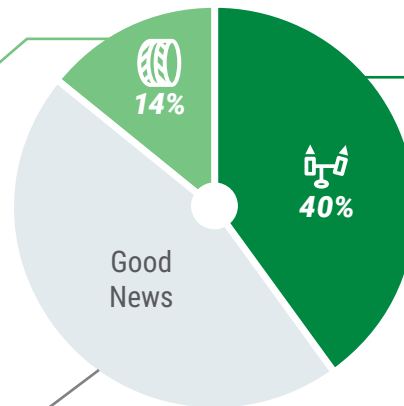

\$1,500*

Potential Tire Revenue Opportunity Per Day

Tire sales are critical to customer retention. The first to show the tire need and ask for the sale gets the order 85% of the time. (NADA 2017)

VALUE-ADDED OPPORTUNITIES

Informing vehicle owner of passing vehicle inspection results builds consumer trust.

ALIGNMENT REPAIR OPPORTUNITIES

\$1,000*

Potential Alignment Revenue Opportunity Per Day

Alignment service has the highest margin in your shop, with 68% profit. (MTD 2016)

⚠ Potential Open Recall
8% Revenue Opportunities

Powered by **CARFAX**
VEHICLE HISTORY REPORTS

* Based on 20 vehicles per day shop average, an average tire replacement of \$150 in revenue, and an average four-wheel alignment of \$100 in revenue. Tire failure rates based on Hunter study of 25,000 vehicles. Alignment failure rates based on Hunter study of 1 million Quick Check Drive® results.
